

## **BATTLE CREEK PUBLIC SCHOOLS**

### **2022-2023 ANNUAL AHERA NOTIFICATION**

This notice is to inform you that the Battle Creek Public School District has completed an asbestos inspection and management plan as required by the Asbestos Hazard Emergency Response Act (AHERA). The management plan has been accepted by the state of Michigan and is available for your review in the office of each school building. The management plan contains information regarding the location of asbestos containing material (ACM) in all school buildings, the condition of the ACM, and a plan for dealing with the ACM.

At least once each school year, the district will inform you in a similar manner about asbestos activities, including: re-inspection, periodic surveillance, response actions, and post response action activities that are either planned or in progress.

The following asbestos related activities are currently planned or in progress for the 2022-2023 school year.

**Periodic surveillance:** Once every six months, ACM must be visually inspected for changes in condition. This will be performed by a third party consultant. Our periodic surveillance will be scheduled for November 2022 and May 2023. ACM will be repaired, if damaged, and maintained by the district's Operations and Maintenance Program (O&M).

**Response actions:** These are the activities designed to reduce or eliminate the potential for asbestos hazards. In general, the asbestos containing materials present in school buildings are listed in each building management plan.

A copy of the District's asbestos management plan is available upon request. If you have any questions or concerns regarding this plan, please contact the Facilities and Operations Department at (269) 965-9425.

Sincerely,

A handwritten signature in black ink that reads 'Joshua Bowman'.

Joshua Bowman - Director of Facilities
